

# Awesome Web Data Visualizations

with Google Maps Platform and deck.gl

---

Alex Muramoto

# Before We Begin

- 1 **Google Cloud account**  
<https://console.cloud.google.com>
- 2 **Node.js**  
<https://nodejs.org>
- 3 **Starter code**  
<https://goo.gle/g4g-deck-starter>
- 4 **npm install**

# Who am I?

Developer Advocate, Geo

@alexmuramoto

# Agenda

- What is deck.gl?
- Why deck.gl?
- How does it work?
- Code!

# What is deck.gl?

- WebGL-powered data viz framework
- Layer-based visualization rendering
- Primarily built for geo and mapping
- Google Maps JS API initial support now available!

# Why deck.gl?

- Really, really... really large datasets
- Beautiful visualizations out of the box
- Automatic handling of animations, resizing, etc.

Map Satellite

It's Awesome.

How Does it Work?

No Questions.  
Just Awesome.

# How Does it Work?

- WebGL
- Canvas API
- Maps JavaScript API OverlayView
- Reactive programming model
- Custom layers

What can deck.gl do?
